

Roll•a•matic **GR II**®

Roller Door Operator

Roll•a•matic GR II®

The Roll•a•matic GR II® operator is a quiet, smooth and reliable operator which can be found in many countries world wide. Comprising of the most up-to-the-minute technology the Roll•a•matic GR II® operator is a must for any home.

Convenience, Safety and Security

Home owners world wide are increasingly becoming aware that a Roll•a•matic GR II® Roller Door operator is something that you cannot do without. This operator when installed on a Roller Door will provide you with convenience you can rely on at the press of a button with your Glide-a-Code® transmitter. Gone are the days of getting out of your car at night or in the rain, the Roll•a•matic GR II® operator with its numerous safety and security features will see to this.

Value for Money

Roll•a•matic GR II® includes everything to convert a manually operated Roller Door to automatic remote control. A powerful motor and drive unit with a manual or automatic operation lever, a Glide-a-Code® radio transmitter handset to operate your door from inside the car and a wall control mounted inside the garage containing a radio receiver, sophisticated electronics, an automatic light and a push button control for door operation inside the garage.

Quick and Trouble Free Installation

The Roll•a•matic GR II® supplied as a separate operator converts most existing manual roller doors to automatic remote control. Installation to an existing Roller Door is quick and easy and installed in most situations by a trained technician in a matter of minutes.

Opening doors around the world®

Roll•a•matic GR II® Roller Door Operator

Above:
By the simple press
of a button operate
your Roller Door.

The Roll•a•matic GR II® Advantages

Drive Unit Each Roll•a•matic GR II® Drive Unit uses two nylon reinforced location forks which lock and engage the Roller Door drum wheel to the Roll•a•matic GR II®. Using minimal sideroom the drive unit and motor remain stationary fixed to the door bracket. The Roll•a•matic GR II® drive unit with its internal mechanical gearing activates the door up or down as required.

Low Maintenance Roll•a•matic GR II® uses a hardwearing nylon gear mechanism which will ensure long life with limited maintenance and no lubrication required.

Simple Push Button Either by hand held Glide-a-Code® transmitter or wall mounted push button. The unique rolling code circuitry ensures fail-safe security and eliminates the risk of another handset using the same code.

Able to be fitted to most brands of Roller Door easily and effectively.

Roll•a•matic GR II® Features

Safety Reversing The drive unit automatically reverses should the downward movement of the door be restricted.

Security Coded The Glide-a-Code® transmitter, uses a UHF radio frequency that after each transmission the transmitter and control box

Two nylon
location forks are used to
engage the Roller Door to the
Roll•a•matic GR II® operator.

roll to a new window within a combination range of over 2 billion codes. The Glide-a-Code® transmitter is one of the most secure in the world market and will ensure you that your Roll•a•matic GR II® operator will not be activated by another transmitter. Minuscule in size the Glide-a-Code® transmitter can operate up to three remote Roller Doors and fits neatly onto a keyring.

Low Voltage The wall mounted control box is fully insulated and approved. The operative voltage is a safe low 24 volts (A 3 pin 240V power point is required).

Manual Conversion In the event of power failure, simply moving one lever allows you to use the door manually.

Automatic Light Illuminates your garage for up to five minutes after the Roll•a•matic GR II® is activated. Enables you to drive into an illuminated garage at night.

Control Box and Glide-a-code®

The door can easily be operated using the button on the wall mounted control box or the Glide-a•code® transmitter.

Optional Extras

Roll•a•matic GR III® - Heavy Duty For larger roller doors the Roll•a•matic GR III® heavy duty is the ideal choice. The Roll•a•matic GR III® suits double width roller doors less than 3 metres in height and features a larger heavy duty low voltage DC motor.

Additional Transmitters Extra Glide-a-code® transmitters are readily available on request. You can use up to ten additional transmitters on each Roll•a•matic GR II® unit.

Dual Over-ride Strongly recommended when alternative access to garage is not available. Used to key operate your Roll•a•matic GR II® operator or engage manual operation in case of power failure.

Photo Electric Eye Beam As an added safety feature your Roll•a•matic GR II® operator will automatically stop and reverse should the electric beam be broken by a tangible object interfering with the opening.

Roll•a•matic GR II® & GR III® Guarantee

Each newly installed or retrofitted Roll•a•matic GR II® & GR III® is guaranteed with the Gliderol exclusive 1/5 warranty which provides you with a 1 year warranty on all electrical components and mechanical parts. A 5 year warranty on the drive unit and motor (parts only).

The Company reserves the right to make changes or improvements to the products or accessories without notice and without incurring any obligation to make similar changes or improvements to goods previously ordered.
